

Linking your CAC to your PCTC account

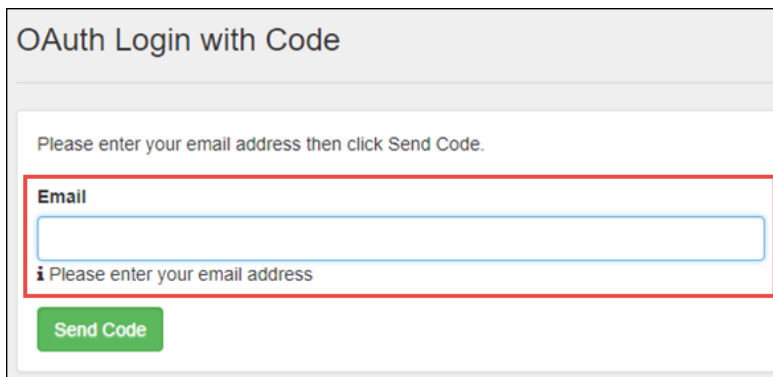

1. With your CAC inserted into the reader, navigate to **pctc.cert.org** and click **Login**.

2. Under **Login with your CAC using Identity Server**, click **CAC Login**.

3. At the prompt, select a certificate from your CAC and enter your CAC pin.
4. After successful validation of your CAC, under **OAuth Login with Code**, enter your email address.

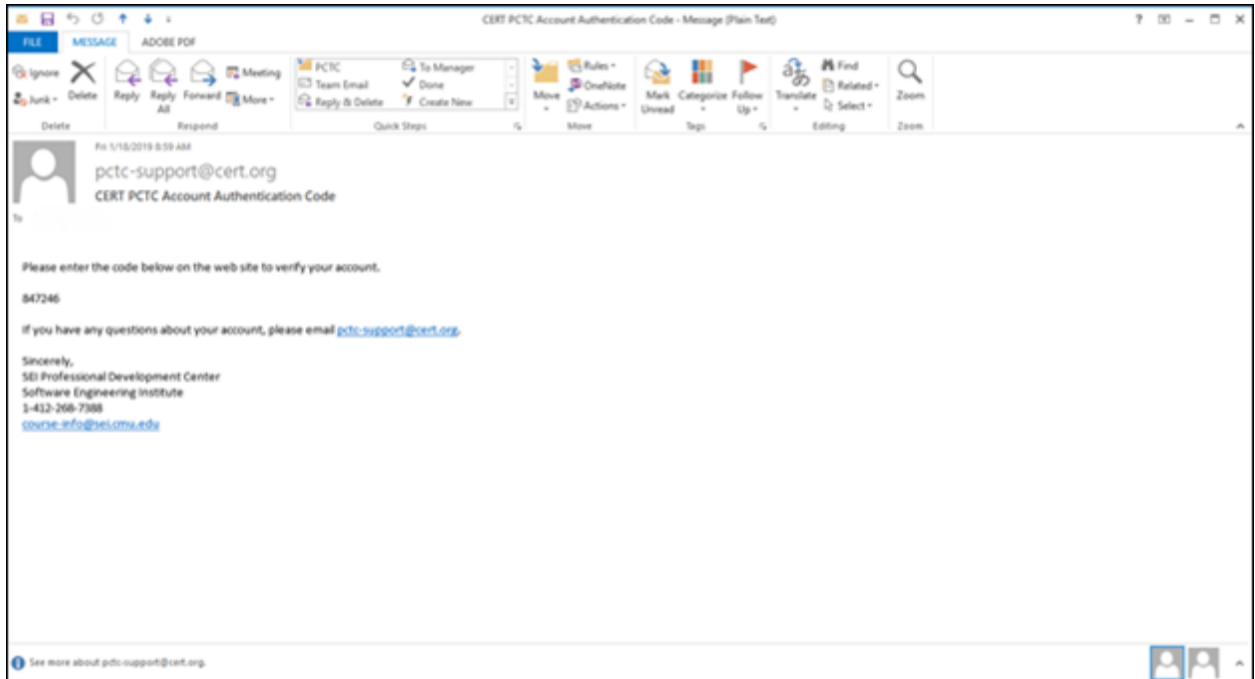

If you **do not** have an existing PCTC account, enter a valid email address that you want to use for registration.

If you **do** have an existing PCTC account, enter the same email address you used during your initial registration. Failure to enter the exact same email address creates a new account. This new account won't have access to your progress. New and existing accounts can't be linked.

5. Click **Send Code**. An email is sent to you containing the code you need to complete the registration process.

6. Enter the code, then click **Validate Code**.

A screenshot of a web form for validating an authentication code. The form contains the text: "A code has been sent to your email. Please enter it here and then click Validate Code." Below this text is a text input field with the code "123456" entered. A red rectangular box highlights the input field and the "Validate Code" button below it. The "Validate Code" button is green with white text.

Entering the code incorrectly on the first try requires a new code. Click the **Send Code** button and wait for a new code to be emailed to you.

Invalid email address or authentication code. Please request a new code by pressing Send Code and try again.

7. Upon successful validation of the code your CAC is now linked to your PCTC account.

Getting Help

If you need help, please send email to **pctic-support@cert.org**.
